Instruction

```
------------------------------------------------------------
                        Instruction
------------------------------------------------------------
Hello, ATTRACT

                  : File/Folder Name :

     You can Lock your Folder or File. IF you want to Lock your
Folde then you have to just Enter Folder Name when it Require or
you can lock your  file, but you  have to specify  filename with
extension.  Suppose you  want to lock "note" file, which is text
file. Then you have to write,

                       note.txt
------------------------------------------------------------

                       : Path :

     You have to  Specify your  Foder/File's  Location by Enter
a path. Suppose you File/Folder is in "EDUFILE" folder which is
in "DATA" folder and your "DATA" Folder is in E: Drive Then you
have to write,

                  E:\EDUFILE\DATA
------------------------------------------------------------
Note :
You have to remember you File/Folder name and path to Unlock it.
------------------------------------------------------------
Press any key to continue . . .
```
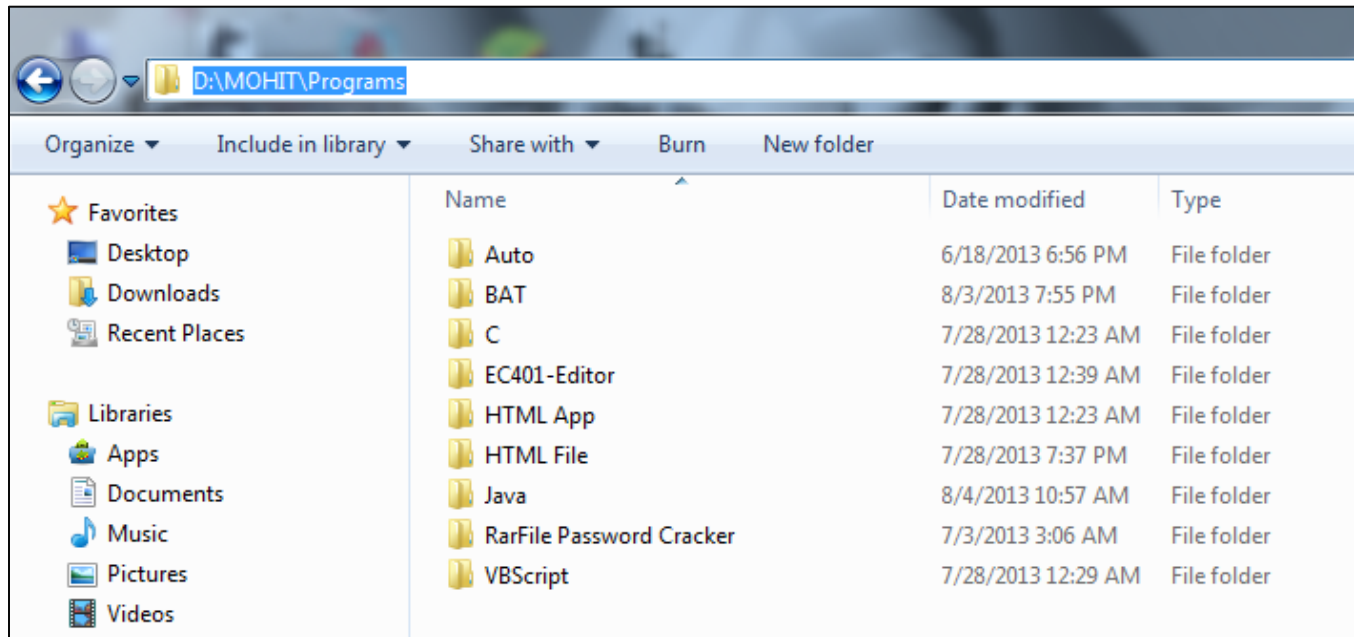

Read This Instruction **Once** Then Hot Enter.
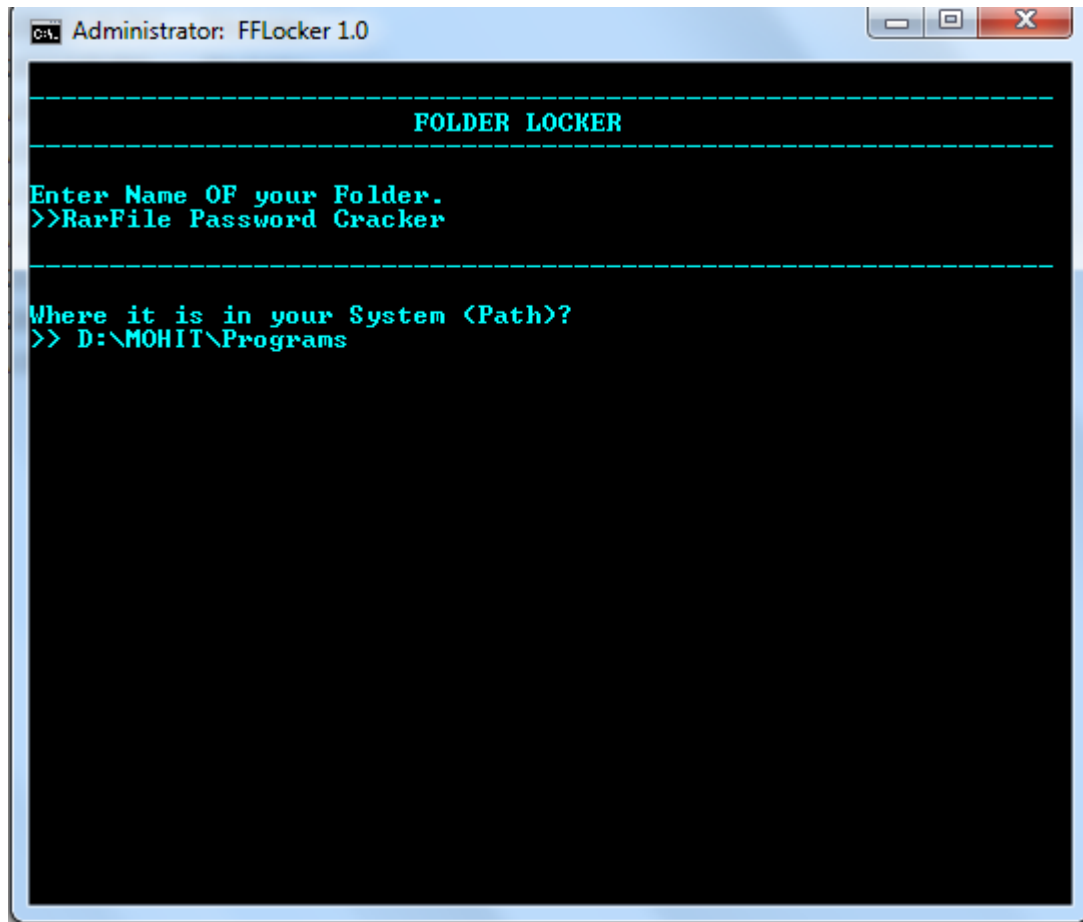

Select Folder

Press **2** to Lock Folder.

Folder Detail

Here I am Locking Folder **"RarFile Password Cracker"** Which is at **"D:\MOHIT\Programs"**

Folder Detail

Type Folder name then hit Enter then after Type Full Path then Hot Enter. You will get the following screen.

Now your Folder Locked Successfully.

Unlock Folder

You can also Unlock your Folder by selecting 2nd option in Following screen. You have to repeat same procedure.
